Bill/Rob,

After consulting with OSI again today, we have determined it would be prudent to postpone the background sediment sampling for one week, based on updated forecasts. The sampling effort has been rescheduled to begin on Monday, November 4th.

I will let CDM-Smith know of the change in plans. Please let me know if you have any questions or concerns.

Subject: Hurricane Sandy

Thai,

I've been taking a close look at the Hurricane forecasts this morning. Of the 6 models I've seen, only one would not affect the job. All models predict it to stay a hurricane until it makes landfall. 3 models are a direct hit to NY and 2 models would go south into DE and then north through PA, dropping a ton of rain in NJ.

At this point, I'd recommend postponing the job for a week. OSI would bring all the boats and people home. Give me a call if you'd like to discuss. Call my cell, I'll be on the water testing today.

Ken
